

Maxillary full-arch implants: Treatment planning: Fixed vs. Removable

Course Description:

Implant therapy in the edentulous or soon-to-be edentulous patient is an expanding segment of clinical practice. Thanks to advancements in technologies and techniques, dental professionals are now able to predictably increase function, form and esthetics for this patient population. The purpose of this course is to provide a comprehensive overview of the evolving treatment options and planning concepts that help contribute to successful full arch treatment. Specific challenges with the edentulous population as well as clinical tips and pitfalls found in specific clinical situations will be discussed.

Course Objectives:

At the completion of this course, participants will be able to understand:

- Various edentulous treatment options including implant-assisted and implant-supported restorations.
- How to identify the best treatment option based on individual patient needs and expectations.
- The importance of diagnosis, communication and treatment planning.
- The benefits of new edentulous treatment options including patient-specific friction-retained prostheses and screw-retained fixed hybrids on a minimum of 4 implants.
- How to simplify and increase the predictability of fixed and removable cases.

Speaker

Mo Koutrach, DDS, F.A.C.P is a board certified prosthodontist with over 20 years of experience in fixed, removable and implant dentistry. He is a diplomate of the American Board of Prosthodontics and a fellow of the American College of Prosthodontics. Dr. Koutrach has maintained a private practice in West Bloomfield, Michigan for more than 10 years. In 2014 he moved to Houston, Texas and started a private practice specializing in Prosthetic and Implant Dentistry. Dr. Koutrach received his DDS degree from University of Detroit Mercy School of Dentistry. He completed his specialty certificate in Prosthodontics at the Indiana University School of Dentistry and his Maxillofacial Prosthodontics certificate from the University of Pittsburgh School of Dental Medicine. He also attended one year of fellowship in the graduate Periodontics program at University of Michigan in Ann Arbor. Dr. Koutrach has been involved in academic teaching throughout his career and currently services as a Clinical Associate Professor at University of Texas Health Center (UTH) School of Dentistry. He lectures nationally and internationally in the field of Prosthodontics and dental implantology. Dr. Koutrach has written numerous publications on dental implants and Prosthodontics.
